COLORBOND® steel colours for roofing and rainwater goods

If you're matching a repair to an existing metal roof, or choosing gutters, fascia and downpipes to go with it, the current COLORBOND® steel colour range is the usual starting point. You can match the roof, or pick a contrast.

Either way, check a physical sample — colours on a screen are only a guide.

BlueScope's current core range has **22 colours** in a Classic (low sheen) finish. The same 22 are available for rainwater goods — gutters, fascia and downpipes. Six of those colours also come in a premium Matt finish. Availability can vary by profile and supplier, so confirm before you order.

Classic finish — 22 core colours

These are the official current core colours for roofing and walling, and for gutters, fascia and downpipes, as listed by BlueScope / COLORBOND and STEEL SELECT.

Dover White™

Surfmist®

Evening Haze®

Classic Cream™

Paperbark®

Dune®

Southerly®

Shale Grey™

Bluegum®

Windspray®

Gully®

Jasper®

Wallaby®

Basalt®

Woodland Grey®

Monument®

Night Sky®

Ironstone®

Deep Ocean®

Cottage Green®

Pale Eucalypt®

Manor Red®

Colours on screen are a guide only. Check a physical sample or BlueScope's colour chart before choosing.

Matt finish

Six core colours are also offered in a Matt finish, which diffuses light for a softer look: Surfmist®, Dune®, Shale Grey™, Bluegum®, Basalt® and Monument®. Gutters, fascia and downpipes are also offered in these Matt colours.

Surfmist® Matt

Dune® Matt

Shale Grey™ Matt

Bluegum® Matt

Basalt® Matt

Monument® Matt

Near the coast (Gold Coast)

For buildings close to the ocean, the *product* matters as well as the colour. BlueScope's simple guide for roofing is:

- More than 200 m from breaking surf — COLORBOND® steel is recommended
- 100–200 m from breaking surf — COLORBOND® Ultra steel is recommended
- Closer than that, or for other marine conditions — see BlueScope Technical Bulletin TB-01A, and get site-specific advice

Distances are measured from the high-water / tide mark, and local conditions (prevailing winds, unwashed areas) can change what is suitable. BlueScope classifies Gold Coast beaches as a surf marine environment, and The Broadwater as exposed marine (Technical Bulletin TB-35).

COLORBOND® Ultra steel is listed in seven core Classic colours as standard: Surfmist®, Dune®, Shale Grey™, Windspray®, Wallaby®, Woodland Grey® and Monument®. Other Classic colours may be available on request.

A note on other palettes

Fencing has some extra colours (for example Domain®, Riversand®, Wilderness® and Wollemi®) that are not part of the 22-colour roofing and rainwater core range. Metallic and COLORBOND® Coolmax® finishes are separate ranges and are not listed here as standard roofing or gutter colours.

Colours on screen are a guide only. Check a physical sample or BlueScope's colour chart before choosing. The swatches use official HEX values published by BlueScope / STEEL SELECT® for the current core range. The colours shown have been reproduced to represent actual product colours as accurately as possible. However, we recommend checking your chosen colour against an actual sample of the product before purchasing, as varying light conditions, screens and devices may affect colour tones and finishes. COLORBOND®, BlueScope, STEEL SELECT® and the ® colour names are registered trade marks of BlueScope Steel Limited. ™ colour names are trade marks of BlueScope Steel Limited.
